Portfolio

PROFESSIONAL SUMMARY

A frontend developer with a passion for creating efficient, scalable, and maintainable applications. Specializing in frontend development with a focus on user experience and performance optimization.

SKILLS

JavaScript React Html css Tailwind CSS Node JS Express JS Mongo DB

PROJECTS

Recipes App (Frontend Application)	2025-12-26 - 2025-12-28
Developed a responsive recipe discovery application that allows users to search, filter, and explore meals with detailed cooking instructions using real-time API data.	
Key Contributions:	
1.Integrated MealsDB API for dynamic recipe data	
2.Implemented instant search and category-based filtering	
3.Built reusable UI components for scalability	
4.Designed a clean, responsive interface for seamless user experience	
5.Handled API states including loading, error, and empty results	
Smart Expense Tracker (Full Stack Application)	2025-12-01 - 2025-12-03
Created an interactive expense tracking application to manage daily transactions and visualize financial data through real-time charts.	
Key Contributions:	
1.Developed features for adding, editing, and deleting transactions	
2.Implemented global state management using Context API	
3.Integrated Recharts for dynamic financial visualizations	
4.Built responsive dashboard with real-time balance calculations	
5.Designed category-based expense tracking system	
Go-Eventz (Full Stack Event Management Platform)	2026-01-15 - 2026-02-01
Developed a responsive recipe discovery application that allows users to search, filter, and explore meals with detailed cooking instructions using real-time API data.	
Key Contributions:	
1.Integrated MealsDB API for dynamic recipe data	
2.Implemented instant search and category-based filtering	
3.Built reusable UI components for scalability	
4.Designed a clean, responsive interface for seamless user experience	
5.Handled API states including loading, error, and empty results	
WChatApp (Real-Time MERN Chat Application)	2026-04-06 - 2026-04-10
Created an interactive expense tracking application to manage daily transactions and visualize financial data through real-time charts.	
Key Contributions:	
1.Developed features for adding, editing, and deleting transactions	
2.Implemented global state management using Context API	
3.Integrated Recharts for dynamic financial visualizations	
4.Built responsive dashboard with real-time balance calculations	
5.Designed category-based expense tracking system	

FruitVerse (Frontend Application)

2026-04-24 - 2026-04-25

Developed a modern fruit-based product web application focused on delivering a seamless and responsive shopping experience for healthy lifestyle products.

Key Contributions:

- 1.Built dynamic product listing with category-based filtering
- 2.Developed reusable UI components
- 3.Implemented global state management using Context API
- 4.Designed product detail pages with interactive UI and add-to-cart functionality
- 5.Created a fully responsive layout using Tailwind CSS for mobile and desktop
